Guardian Hinged Door Operator

Guardian Hinged Door Operator | General Information

The Guardian hinged door electric operator is an economical option for opening domestic hinged doors.

The door operator fits to the door the same way a hydraulic operator fits with the exception of an additional power cable.

These units are so powerful they can operate up to a 1500mm wide door weighing 200kg.

And like all the Guardian Door Operators these come with two wireless wall mounted "Press" switches to make opening the door easier.

All of the essential operating functions are fully adjustable like opening and closing speeds and closing forces.

Other sensor options we carry are a Card Reader for a security purposes, Infra Red Beam sensor or even a Pet Mat Sensor option that will allow your pet to open the door when it stands on the mat.

All these additional sensor options are wheelchair friendly .

To fit to an existing door all that will be required is to have a 240 volt power supply in a close vicinity to the door.

The unit comes with a brushed aluminium finish cover which can easily be powder coated to match the door colours.

Guardian Hinged Door Operator | Specifications
