# Guardian Sliding Door Operator

## Guardian Sliding Door Operator | General Information

The Guardian Sliding Door Operator is designed to fit to existing domestic sliding doors.

The Sliding Door Operator kit has an aluminium removable cover that allows the main drive unit to be fixed neatly in place with nonvisible fixings.

Also included in the kit is two 500mm nylon racks for a max opening width of 1000mm that fit easily to the sliding panel making operation smooth and quiet. Additional track can be purchased for longer door openings.

Two wireless wall mounted "Press" switches can be fitted in any suitable location either side of the door to also make opening the door easier.

Other sensor options we carry are a Card Reader for a security purposes, Infra Red Beam sensor or even a Pet Mat Sensor option that will allow your pet to open the door when it stands on the mat.

All these additional sensor options are wheelchair friendly .

To fit to an existing door all that will be required is to have a 240 volt power supply in a close vicinity to the door.

For a more neater installation we can run the wires inside the wall cavity before the walls are sheeted at the time on construction eliminating the need for an external transformer and power point.

## Guardian Sliding Door Operator | Operating Function Options

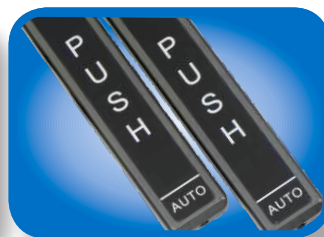

- Automatic
- Always open
- Pet sensor
- Full Lock
- Manual
- Self learning
- Self locking
- Anti pinch
