Window Intellect

General Information

Window Automation System controller.

Smoke Ventilation systems have been around for quite a while now and over the past 25 years we have made and installed well over 2000 of these systems. With more and more demand for multiple sensor window automation and interfacing all of a buildings systems to function together one product was needed to make this happen.

Capitalizing on all the years of our Smoke Ventilation experience we teamed up with a local electronics engineer and the Window Intellect was born. It boasts all the functions of the imported window control systems but is made by a local supplier using as many locally produced parts as possible.

Window Intellect

Specifications

Each Window Intellect controller is housed in an Australian made fire proof enclosure Featuring:

- 72-hour battery back-up.
- Low battery monitoring and alarm
- Prioritised Fire inputs to override all other input signals
- Fail Safe Fire inputs which still activate if the cable is cut or damaged.
- Building Management System (BMS) inputs
- Auto close on power loss.
- Security system input
- Master over-ride control
- Closed window Status
- Indicator warning light system on the front of control panel control
- Compatible with BREEZEWAY POWERLOUVRES
- Phone app to set timer.
- Phone app for Master switch control.

WINDOW INTELLECT
AUSTRALIA

by Unique Window Services

- Rain sensor input
- Wind sensor input
- Temperature control
- Radio Frequency Master over-ride control
- Multifunction timer includes Night Purge

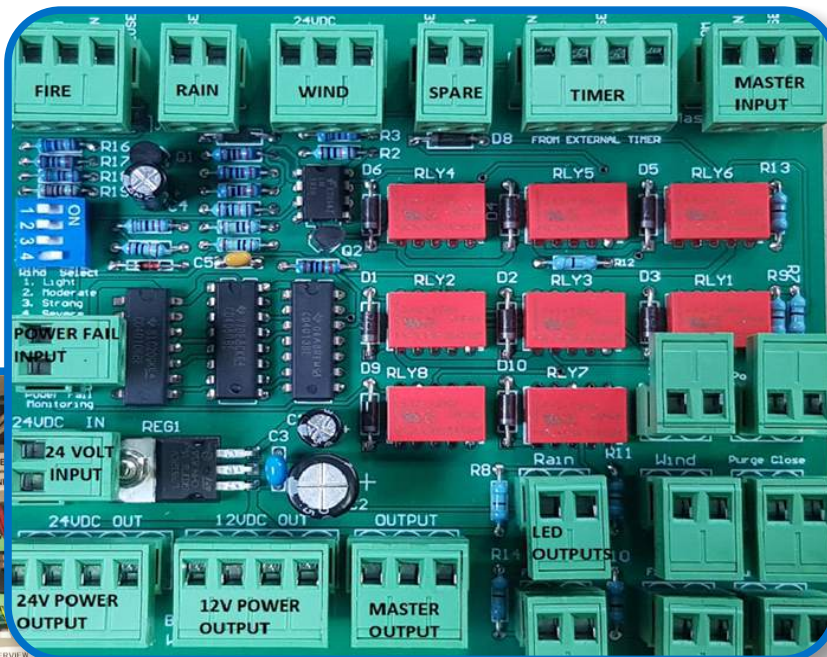

The beauty of this system is that it is completely modular, so if you only need a fail-safe battery back-up system and none of the sensors or timers the Window Intellect controller has the Fire system requirements standard specifically to keep costs to a minimum.

But if it is all the bells and whistles you are after, covering multiple levels over large floor spaces with multiple zones.

The Auto Intellect is the perfect solution as this is exactly what we have created this product for.
